	PREAMBLE		9
1.	**FOREWORD**		10
2.	**GUIDE TO THE SYLLABUS**		11 – 12
3.	**SYLLABUS**		13 – 114
Unit 1	**Principle of Mathematical Induction**		13 – 18
1.1	Concept of Mathematical Induction	2	
1.2	Steps in the Method of Mathematical Induction	2	
1.3	Application of Mathematical Induction	4	
		8	
Unit 2	**Binomial Theorem for Positive Integral Indices**		19 – 21
2.1	The n! and C_n^r Notations	1	
2.2	The Pascal Triangle	1	
2.3	Expanding Binomials using the Pascal Triangle	2	
2.4	Binomial Theorem for Positive Integral Indices	4	
		8	
Unit 3	**Quadratic Equations and Quadratic Functions**		22 – 25
3.1	Solution of Quadratic Equations	8*	
3.2	Nature of Roots	4	
3.3	Quadratic Functions	4	
		8* + 8	
Unit 4	**Trigonometry**		26 – 38
4.1	Radian Measure	2*	
4.2	The Six Trigonometric Functions of Angles of Any Magnitude and their Graphs	4* + 4	
4.3	Compound Angles	10	
4.4	The Subsidiary Angle Form	2	
4.5	General Solution of Simple Trigonometric Equations	4	
4.6	Solution of Triangles	10*	
4.7	Problems in Two and Three Dimensions	4	
		16*+24	
Unit 5	**Limits and Differentiation**		39 – 56
5.1	Limits	5	
5.2	Derivatives	4	
5.3	Differentiation		
	5.3.1 Simple Algebraic Functions and Rules of Differentiation	4	
	5.3.2 Differentiation of Composite Function and Implicit Functions	4	
	5.3.3 Differentiation of Trigonometric Functions	3	
	5.3.4 Higher Derivatives	3	
5.4	Applications of Differentiation		
	5.4.1 Gradients, Tangents and Normals to a Curve	4	
	5.4.2 Maxima and Minima; Sketching of Simple Curves	5	
	5.4.3 Rates of Change	2	
	5.4.4 Small Increments	2	
		36	
Unit 6	**Inequalities**		57 – 64
6.1	Basic Rules of Inequalities	1*	

		Time Ratio	Page
6.2	Linear Inequalities in One Variable	1*	
6.3	Quadratic Inequalities in One Variable	1* + 2	
6.4	Inequalities of the Form $\frac{ax+b}{cx+d} \geq k$	2	
6.5	Absolute Values	1	
6.6	Inequalities involving Absolute Values	3	
6.7	Absolute Inequalities	1	
		3* + 9	
Unit 7	**Coordinate Geometry**		65 – 83
7.1	Plane Rectangular Coordinates and Distance between Two Points	1*	
7.2	Area of Rectilinear Figures	3	
7.3	Inclination and Slopes of Straight Lines	1*	
7.4	Angle between Two Straight Lines	3	
7.5	Equations of Straight Lines	1*	
7.6	The Normal Form	5	
7.7	Family of Straight Lines	3	
7.8	Concept of Locus	1* + 1	
7.9	Equation of a Circle; Intersection of a Straight Line and a Circle	7*	
7.10	Equation of Tangents to a Circle	4	
7.11	Family of Circles	4	
7.12	Parabola, Ellipse and Hyperbola in Standard Position	2	
	7.12.1 Parabola	3	
	7.12.2 Ellipse	3	
	7.12.3 Hyperbola	3	
7.13	Simple Parametric Equations and Locus	4	
		11*+38	

		Time Ratio	Page
Unit 8	**Vectors in the Two-dimensional Space**		84 – 90
8.1	Scalar and Vector Quantities; Equalities of Vectors; Zero Vector and Unit Vector	2	
8.2	Sum and Difference of Vectors; Multiplication of a Vector by a Scalar	3	
8.3	Representation of Vectors in Rectangular Coordinate System	2	
8.4	Scalar Product of Two Vectors	4	
8.5	Application of Vectors: Division of a Line Segment, Parallelism and Perpendicularity	3	
		14	
Unit 9	**Integration**		91 – 103
9.1	Indefinite Integral	1	
9.2	Integration of Simple Functions and Simple Applications	4	
9.3	Simple Techniques of Integration	9	
9.4	Definite Integral	2	
9.5	Evaluation of Definite Integrals	4	
9.6	Application of Definite Integrals	8	
		28	
Unit 10	**Complex Numbers**		104 – 114
10.1	Complex Numbers in Rectangular Form	1	
10.2	Addition, Subtraction, Multiplication and Division of Complex Numbers	2	
10.3	Complex Numbers in Polar Form	2	
10.4	Multiplication and Division of Complex Numbers in Polar Form	2	
10.5	Simple Loci and Complex Numbers	4	

		Time Ratio	**Page**
10.6	De Moivre's Theorem	3	
10.7	The n th Root of Unity	3	
		17	

總數： 38*+190
