主旨: Third Strategy on IT in Education
附件:

Dear Sir/Madam,

We understand resources are ever limiting and the task of education is daunting. Pouring in whatever amount of resources... creating CIOs may not be enough, but raising the interest and potential of teachers and learners (students), etc, will definitely help our educational goal.

Can we arrange some pilot sites to make use of 'Serious Game (Game re-purposed for serious matters/subject)' to help built will power and some domain specific knowledge of students. This way, students could be released from traditional framework in some time slots and get interested in the learning which can be guided by teachers.... The issue is a hot topic in UK.
