

Territory-wide System Assessment (TSA)

教育局
Education Bureau

Objective of TSA

TSA aims to find out how well students learn in the three subjects of Chinese Language, English Language and Mathematics, so as to improve teaching and help students learn better.

TSA questions are not difficult at all. We have learnt them in class.

Design of TSA

- **No** assessment results of individual students
- **No implications** to students on school examination results, promotion and Secondary School Places Allocation
- Covering what is taught by teachers in **daily lessons**

Teachers make use of various learning and teaching activities to help us learn.

How much do you know about TSA?

TSA is conducted every May and June. It is designed for Primary 3 and Primary 6 students.

MAY

JUNE

In speaking assessments, we chat with classmates about interesting things in our daily life.

$$492 + 259 = \underline{\hspace{2cm}}?$$

The scope of written assessments is what teachers cover in daily lessons.

Extra preparation for TSA is not necessary. We just need to be attentive in class.
