- **Personal, Social and Humanities Education** - interpersonal skills, social responsibility, economic and resources management

Applied Learning

2023-25 Cohort; 2025 HKDSE

Learning and Teaching

Course Title : **Accounting for e-Business**
Area of Studies : **Business, Management and Law**
Course Provider : **School of Continuing and Professional Education,
City University of Hong Kong**

In Accounting for e-Business, student-centred learning and teaching activities are designed to enable students to understand fundamental theories and concepts, develop their generic skills, and address their career aspirations in accounting and business.

Different modes of activities are employed to provide students with a systematic understanding about the context (e.g. lectures on accounting theories and e-business environment, theme-based projects and interactive activities) and eye-opening opportunities to experience the complexity of the context (e.g. visits to business/industrial organisations and exchange with practitioners in accounting or e-business).

Students acquire an understanding of the requirements, fundamental knowledge and skills essential for further learning within the area through learning-by-practising opportunities in an authentic or near-authentic environment (e.g. exercises in utilising accounting software to preparing financial statements and financial reports).

Students are also encouraged to develop and apply conceptual, practical and reflective skills to demonstrate entrepreneurship and innovation. Students are given opportunities to integrate the knowledge and skills acquired and consolidate their learning (e.g. the integrated project provides students with opportunity to explore business ideas, budgeting and risk management, and develop a sustainable financial model in an e-business environment).

Applied Learning

2023-25 Cohort; 2025 HKDSE

Curriculum Pillars of Applied Learning in Context – Accounting for e-Business

Through the specific contexts related to the course, students have different learning opportunities, for example:

1. Career-related Competencies

- understand the core competencies in business world through visits to the workplace and exchange with practitioners from the industry;
- develop business sense through designing a simulated business model; and
- demonstrate practical skills in preparation and analysis of various accounting statements, such as preparing financial reports by using appropriate accounting software and planning of a financial model for e-business.

2. Foundation Skills

- apply a range of IT skills, e.g. search for financial information and present the information graphically;
- apply mathematical skills in analysing accounting data and planning of budgets; and
- demonstrate effective communication skills through participating in group discussion, presentation and interactive activities in simulated e-Business and accounting environment.

3. Thinking Skills

- demonstrate problem-solving skills when facing various difficulties in business and think laterally for solving operational problems;
- develop critical thinking skills when evaluating different means of financing capital, procurement methods, payment systems and marketing strategies; and
- compare and identify relevant financial information for analysing the financial performance of companies and formulate strategies for the business development.

4. People Skills

- understand relationship management, such as resolving conflict, supporting teamwork and collaboration;
- demonstrate interpersonal skills and collaboration skills when interacting with classmates and people in the business world; and
- develop self-management skills such as good time management and task prioritisation skills through planning of e-business.

5. Values and Attitudes

- understand the importance of honesty and integrity in business settings;
- understand the importance of intellectual property right; and
- appraise the importance of social responsibility and business ethics for the long term benefit and sustainability of a business.
