

National Geography Resource Portal

Purpose

This is to inform heads of primary and secondary schools about the details of the captioned resource portal.

Details

2. In response to The Chief Executive's 2024 Policy Address to nurture patriotism among students and the youth, the Education Bureau (EDB) has developed a national geography resource portal to support the learning and teaching of national geography in schools. This resource portal includes six infosheets in Chinese and English versions, covering topics such as our country's administrative divisions, topography, ethnic minorities, energy, population, and innovative transportation. The portal also includes three infographics in Chinese and English versions about our country's administrative divisions, topography, and ethnic minorities. These resources aim to support schools in strengthening national geography education within and beyond the classroom. Teachers can actively use these resources in their teaching so that students can have a more comprehensive and in-depth understanding of our country.

3. The above-mentioned resource portal has been uploaded onto the EDB website below for reference and use by teachers.
