PERSONAL PROFILE

- BA in English Studies and Fine Arts, The University of Hong Kong
- MA in Applied Linguistics, The University of Hong Kong
- PGDE (Secondary), The Open University of Hong Kong
- PhD in Education, The University of Hong Kong

Dr Kevin Yung is an Associate Professor at the Department of Curriculum and Instruction. He is currently the Department's Associate Head in International and Local Engagement. Kevin received his Ph.D. degree at the University of Hong Kong with a focus on senior secondary students' second language selves in shadow education, i.e. private supplementary tutoring. Prior to joining the Education University of Hong Kong, he was a Lecturer at the Centre for Applied English Studies at the University of Hong Kong, where he was awarded an M.A. in Applied Linguistics with overall Distinction and taught English for academic and specific purposes.

Actively serving the community, Kevin has been involved in assessment work for various units of the HKSAR Government. He is a trainer for English language teachers in Hong Kong and Mainland China. He had also hosted a radio programme *English in News* at RTHK for six years. In research, Kevin is interested in the washback of shadow education and high-stakes assessment in the secondary school curriculum. He has recently completed an ECS project funded by the Research Grants Council exploring senior secondary school students' agency in learning English in shadow education. He is currently leading a GRF project investigating underprivileged secondary students' English learning motivation in fee-free supplementary tutoring, and a GRF project about multilingual ethnic minority students' experiences in shadow education.

CDC-HKEAA Committee on English Language

Terms of Reference

The CDC-HKEAA Committee on English Language is a specialist group set up under the KLA Committee on English Language Education and the HKEAA Public Examinations Board (PEB) to carry out tasks as designated by the CDC and the HKEAA.

- Language learning motivation
- Learner autonomy
- Curriculum and assessment
- AI-enabled language learning

Global attention on the integration of AI in education

UNICEF – Enhance Children’s Digital Literacy

- Children’s schooling, social welfare and future job opportunities may depend on how well they understand the digital world around them (UNICEF, 2025).

USA – Implement GenAI Effectively and Safely in Secondary Education System

- North Carolina Department of Public Instruction (2024) provides comprehensive guidelines and high-quality resources to different stakeholders in the secondary education system (e.g., leadership and vision for school leaders, curriculum and assessment for teachers, and reminders regarding data privacy and cybersecurity).

Canada – Utilise GenAI to Cultivate Learning Creativity in Secondary Classrooms

- The Government of Canada’s guide suggests that incorporating Generative AI into secondary education can improve student achievement by enabling tailored learning experiences and cultivating students’ creative thinking in an early stage (Attard-Frost et al., 2024) .

Global attention on the integration of AI in education

Greece – Enhancing **Content and Language Integrated Learning** via GenAI

- The AsasaraBot project integrated foreign language learning (English/French) with historical content on the Minoan Civilization, demonstrating AI's potential in subject-integrated language learning (Mageira et al., 2022)

South Korea – Employ Customised AI Chatbots in the Secondary English Curriculum

- Kim's team (2019) combined the secondary notebook and national curriculum evaluation guidelines with AI chatbots, Google Assistant and Alexa, and found that these customised chatbots supported students to **achieve high accurate rate in vocabulary and grammar**.

China – Strengthen AI Education through Designated School bases in China

- In 2024, China's Ministry of Education designated 184 schools as AI education bases to **promote AI learning in secondary education** (The State Council of The People Republic of China, 2024)

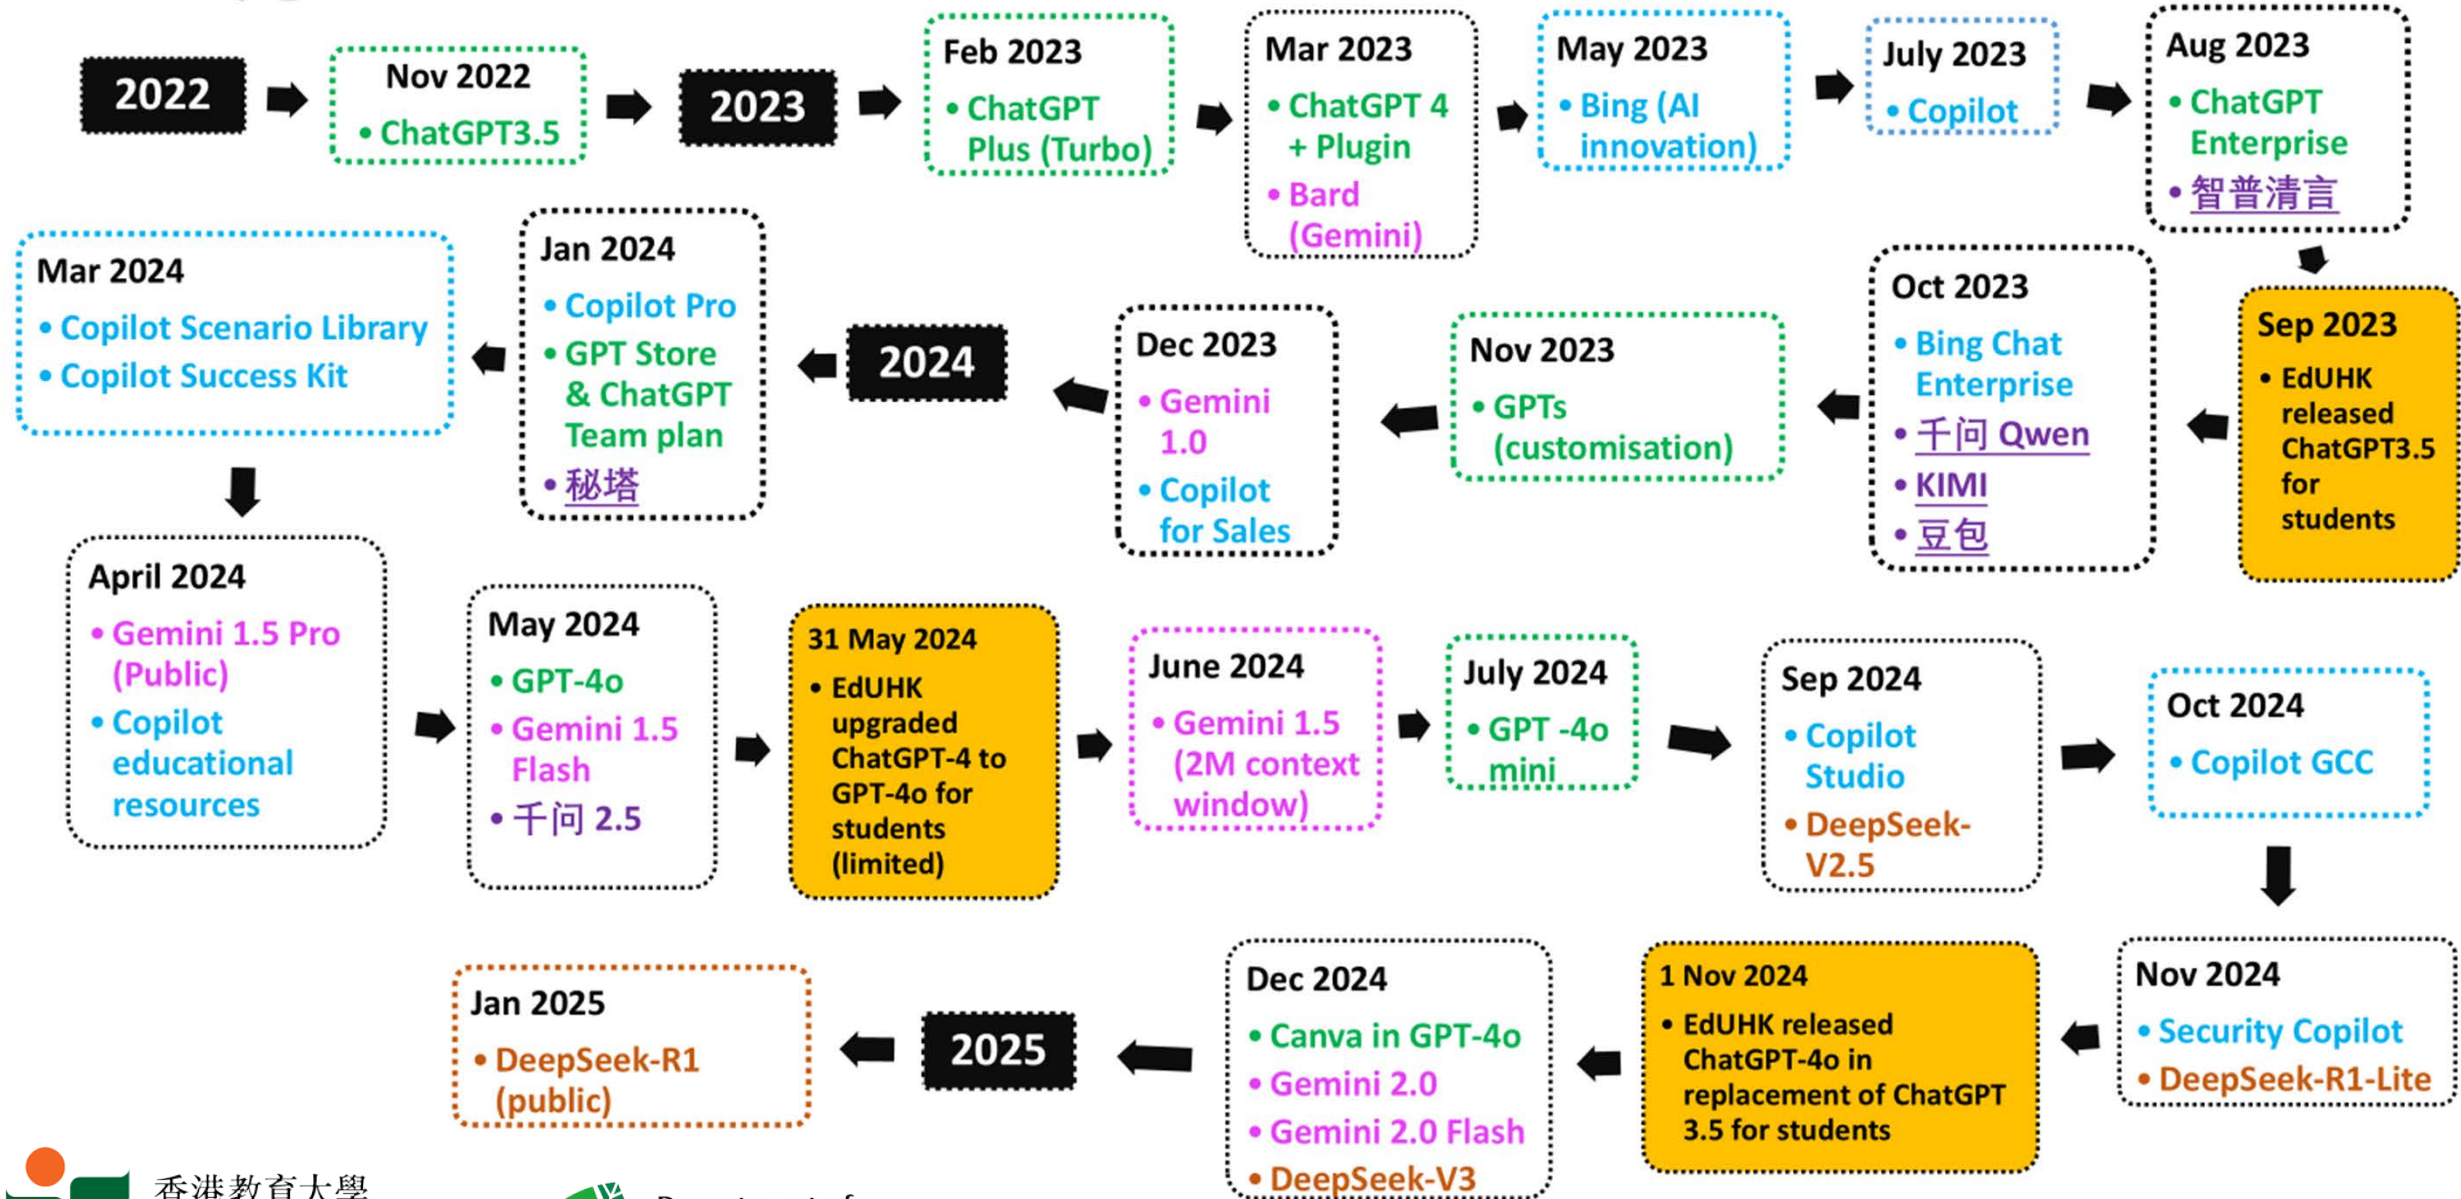

Overall aims of the English Language Education KLA curriculum

- to provide every student of English with further opportunities for extending their knowledge and experience of the **cultures of other people** as well as opportunities for **personal and intellectual development, further studies, pleasure and work** in the English medium
- to enable every student to prepare for the **changing socio-economic demands** resulting from **advances in information technology**; these demands include the interpretation, use and production of materials for **pleasure, study and work** in the English medium.

GenAI upgrade timeliness (Nov 2022 – Jan 2025)

- How can primary and secondary school students in Hong Kong use AI to learn English language by themselves?

Primary and secondary school students in Hong Kong can leverage AI tools to enhance their English language learning in a self-directed manner. Here are some practical ways to use AI for learning English:

1. Language Learning Apps

- **Duolingo:** Gamifies language learning with interactive exercises.
- **Babbel:** Focuses on conversational skills and vocabulary.
- **Lingvist:** Uses AI to adapt lessons to the learner's level.

2. AI-Powered Chatbots

- **ChatGPT:** Engage in conversational practice, ask questions, or request explanations of grammar and vocabulary.
- **Replika:** Practice English in a conversational setting with an AI companion.

3. Speech Recognition Tools

- **Google Translate:** Practice pronunciation and get instant feedback.
- **Elsa Speak:** Focuses on improving English pronunciation with AI-driven feedback.

4. Reading and Writing Assistance Today

- **Grammarly:** Helps improve writing skills by checking grammar, spelling, and style.
- **Quillbot:** Paraphrases sentences to help understand different ways to express ideas.

5. Personalized Learning Platforms

- **Khan Academy:** Offers English lessons tailored to different levels.
- **Coursera and edX:** Provide English courses from universities, often with AI-powered recommendations.

6. AI-Enhanced Vocabulary Builders

- **Memrise:** Uses spaced repetition and AI to help memorize vocabulary.
- **Quizlet:** Create flashcards or use AI-generated study sets for vocabulary practice.

7. Listening and Speaking Practice

- **YouTube with AI Subtitles:** Watch English videos with AI-generated subtitles to improve listening skills.
- **Speechling:** Practice speaking and get feedback from AI coaches.

8. AI Tutors

- **Socratic by Google:** Helps with English homework and provides explanations.
- **Century Tech:** Offers personalized English learning paths based on AI analysis.

9. Interactive Storytelling and Games

- **Epic!:** Offers a vast library of English books with AI-driven recommendations.
- **Minecraft Education Edition:** Encourages English communication and collaboration in a virtual environment.

10. Online Communities and Forums

- **Reddit (e.g., r/EnglishLearning):** Engage with native speakers and other learners.
- **Discord Language Servers:** Join English learning communities for practice and support.

Tips for Effective Self-Learning:

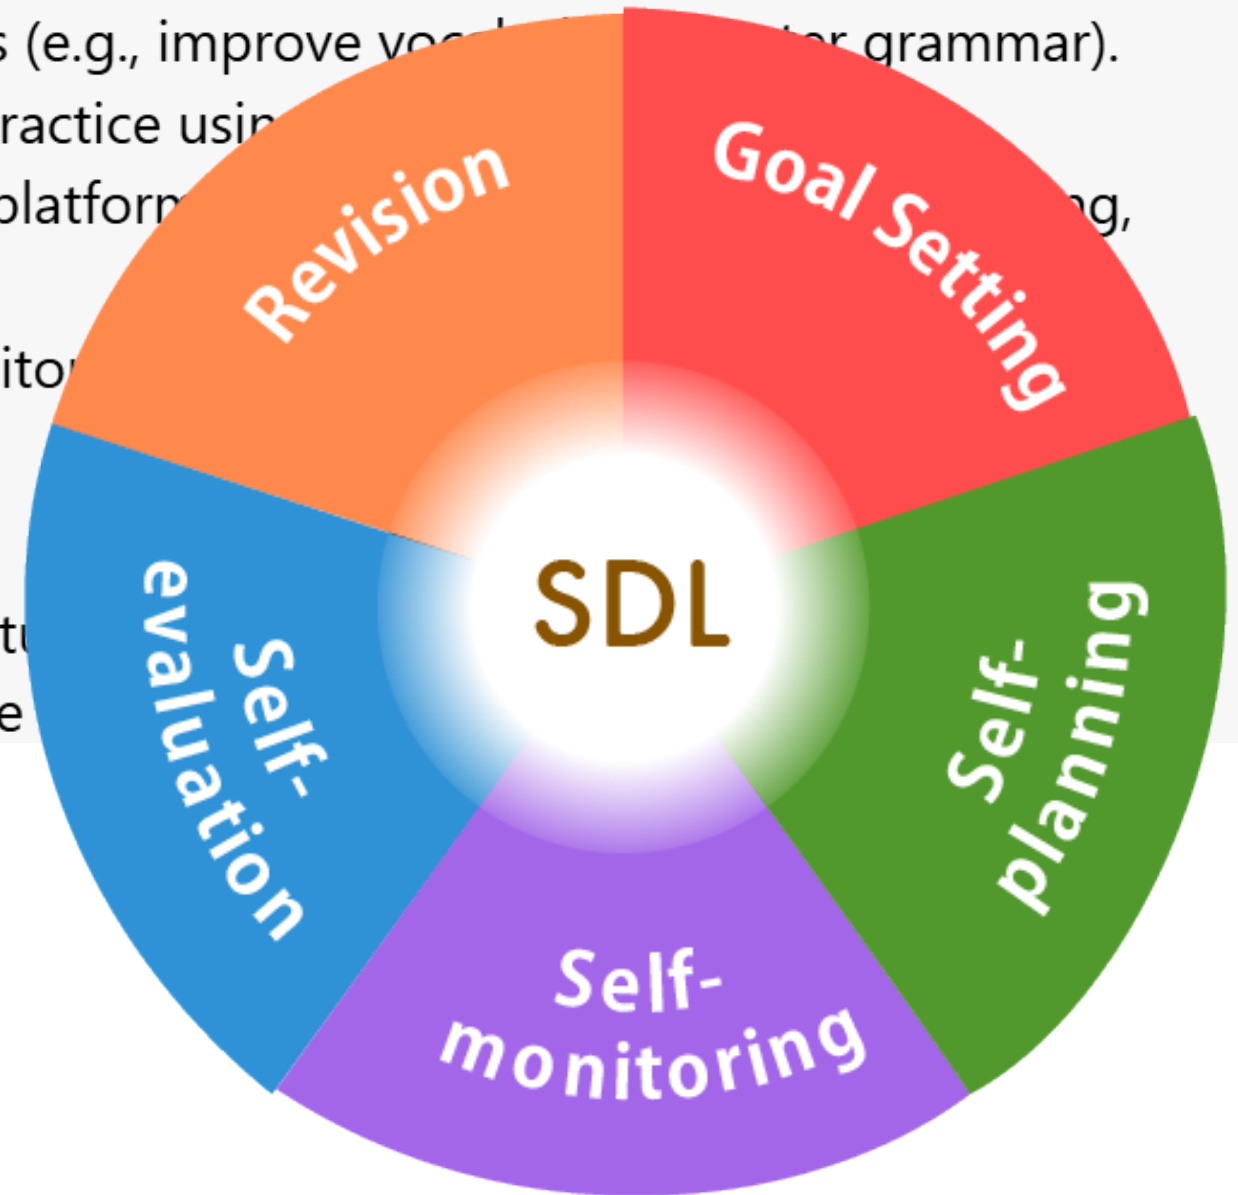

- **Set Goals:** Define clear, achievable goals (e.g., improve vocabulary, master grammar).
- **Consistency:** Dedicate regular time to practice using AI tools.
- **Combine Tools:** Use a mix of apps and platforms to cover all language skills (reading, writing, listening, speaking).
- **Track Progress:** Use AI analytics to monitor improvement and adjust learning strategies.

By integrating these AI tools and strategies, students in Hong Kong can effectively and independently improve their English language skills.

Tips for Effective Self-Learning:

- **Set Goals:** Define clear, achievable goals (e.g., improve vocabulary, master grammar).
- **Consistency:** Dedicate regular time to practice using AI tools.
- **Combine Tools:** Use a mix of apps and platforms (e.g., grammar checkers, writing, listening, speaking).
- **Track Progress:** Use AI analytics to monitor learning progress and adjust strategies.

By integrating these AI tools and strategies, students can independently improve their English language skills.

Research on AI for Language Learning

- Woo et al. (2024) examine the use of ChatGPT in EFL writing instruction through a workshop involving 21 HK secondary school students.
- findings suggest that, while ChatGPT enhances student engagement and writing, its use can be **cognitively demanding**, especially for those unfamiliar with AI tools.
- Teachers should provide **structured scaffolding**, particularly in **prompt skills**, to support student adaptation and maximise learning benefits.

Teaching EFL students to write with ChatGPT: Students' motivation to learn, cognitive load, and satisfaction with the learning process

Abstract

This mixed methods study explores EFL students' experiences and perceptions as they learn to write a composition with ChatGPT's support in a classroom instructional context. Students' perceptions are explored in terms of their motivation to learn about ChatGPT, cognitive load and satisfaction with the learning process. In a workshop format, twenty-one Hong Kong secondary school students were introduced to ChatGPT, learned prompt engineering skills, and attempted a 500-word English language writing task with ChatGPT's support. Data collected included a pre-workshop motivation questionnaire, think-aloud protocols during the writing task, and a post-workshop questionnaire on motivation, cognitive load, and satisfaction. Results revealed no significant difference in students' motivation before and after the workshop, but mean motivation scores increased slightly. Students reported high cognitive load during the writing task, especially during prompt engineering. However, students expressed high satisfaction with the workshop overall. Findings indicate ChatGPT's potential to engage EFL students in the writing classroom, but its use can impose heavy cognitive demands. To ensure that ChatGPT use supports EFL writing without overwhelming students, educators should consider an iterative design process for activities and instructional materials and carefully scaffolding instruction, especially for prompt engineering.

Research on AI for Language Learning

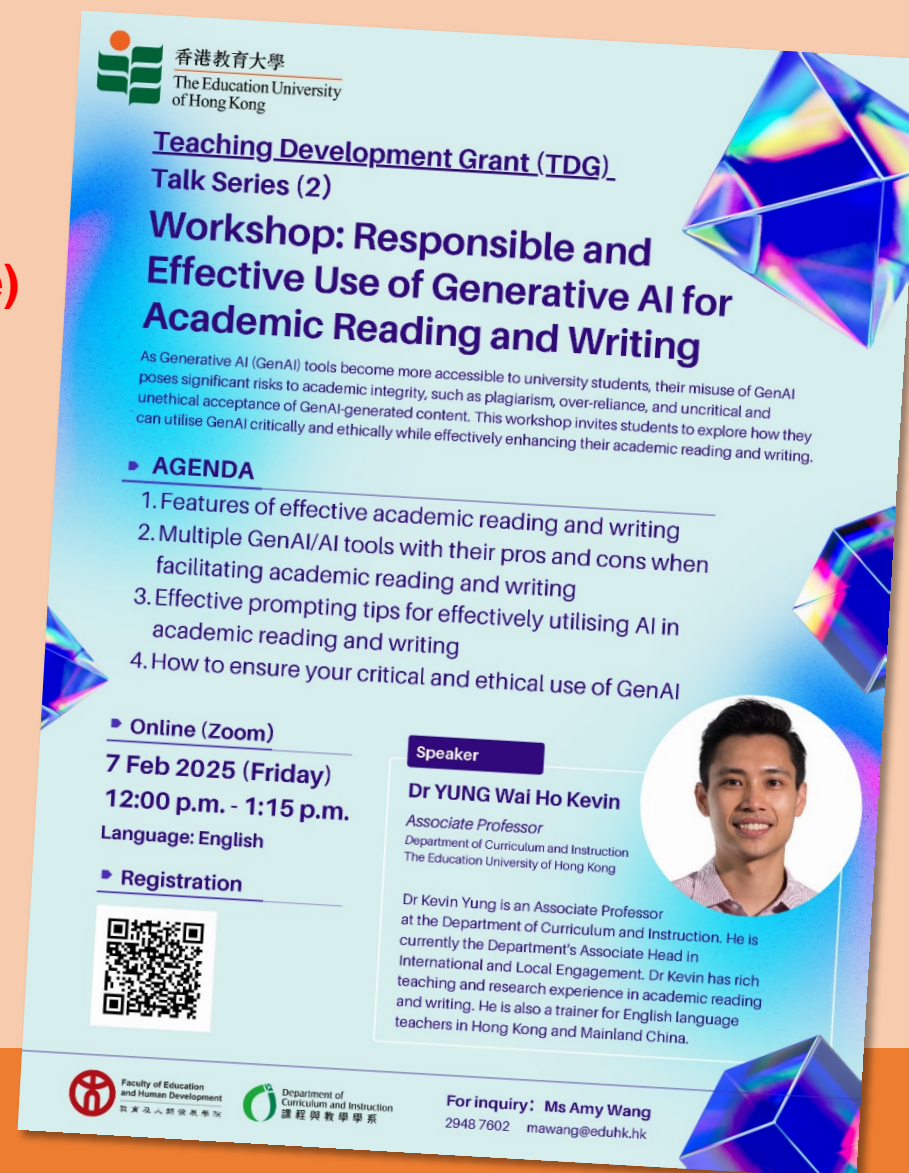

- 204 sophomore EFL learners in a Chinese university completed a critical thinking test, self-directed learning questionnaire and a writing task.
- significant correlations between **critical thinking skills**, **self-directed learning competence**, and **AI-assisted writing**.
- **self-directed learning** moderated the relationship between **critical thinking skills** and **AI-assisted writing**.
- using **AI-assisted tools critically and independently** in writing can mitigate the tendency to over-rely on these tools.

Research on AI for Language Learning

Survey (N = 325) and focus-group interviews (n = 48) with university students: **A GUIDE-S pedagogical framework**

- **Ground** students in the features of academic writing and raise their writing confidence (**a threshold of English competence**)
- Encourage students to **Utilise** a diverse range of GenAI tools for different purposes and make appropriate choices
- Lead students to **Inspect** the pros and cons of different GenAI tools for different purposes of academic reading and writing
- **Demonstrate** how to give proper prompts to GenAI
- **Establish** accountability for the ethical use of GenAI by requiring students' reports with continuous GenAI records
- The whole process should be **Student-centred**

Workshop: Responsible and Effective Use of Generative AI for Academic Reading and Writing

As Generative AI (GenAI) tools become more accessible to university students, their misuse of GenAI poses significant risks to academic integrity, such as plagiarism, over-reliance, and uncritical and unethical acceptance of GenAI-generated content. This workshop invites students to explore how they can utilise GenAI critically and ethically while effectively enhancing their academic reading and writing.

► **AGENDA**

1. Features of effective academic reading and writing
2. Multiple GenAI/ AI tools with their pros and cons when facilitating academic reading and writing
3. Effective prompting tips for effectively utilising AI in academic reading and writing
4. How to ensure your critical and ethical use of GenAI

► **Online (Zoom)**
7 Feb 2025 (Friday)
12:00 p.m. - 1:15 p.m.
Language: English

Research on AI for Language Learning

Promote adaptive and self-regulated learning

- Tailor learning to **students' readiness and interest** (Abusahyon et al., 2023; Tang et al., 2024)
- Increase **student engagement** and **self-regulated learning capacity** (AbuSahyon et al., 2023; Tai & Chen, 2024)
- Enable **interactive** instructional design (Woo et al., 2024)
- Cultivate **high-cognitive thinking skills** (e.g., creative thinking, critical thinking, questioning skills, and reflective thinking) (Ng et al., 2025; Tang et al., 2024)

An Ongoing Research and Development Project

A project with an NGO to support **primary and secondary school students from low-income families** in Hong Kong through the use of **Generative AI** for **adaptive learning**

An AI-Enabled Adaptive Learning System

Project objectives:

- Develop **AI applications** that support students' learning
- Promote **educational equality**, enabling students from low-income families to access extra learning support and resources
- Cultivate students' **self-directed learning** abilities, enabling them to **study independently** outside of class

A Final Word

Teacher's role: To support learners to be **agentic**

- Empower learners to **make choices**
- Encourage learners to **be reflective** in the learning process

Thank you!

Dr Kevin Yung
