Steps in Designing a Tryout Unit

1. Identifying suitable reading materials of a variety of text types to explore their connections with other KLAs and to facilitate reading across the curriculum.

2. Identifying a theme that provides links between textbook units and the reading materials.

3. Designing focus questions to explore the message conveyed and to provide linkage between different reading materials.

4. Designing activities for students to understand and interact with the content of the book, to develop reading skills and strategies, to enhance their vocabulary building strategies and to study the language features of the text types.

5. Designing cross-KLA activities that help students connect their learning experiences in the ELE KLA and other KLAs.
