Preface

Purpose

As a close partner with schools, the Curriculum Development Institute (CDI) has been organising a Series of Professional Development Programmes (PDPs) on curriculum development every year for school heads and teachers. The purposes are to help them achieve personal learning goals, gain professional knowledge, enhance pedagogical skills and develop leadership skills suited to the needs of their students and the contexts of their schools.

Under the ongoing renewal of the school curriculum, we trust that schools have already identified school-based capacity building needs for their teachers. We encourage schools to make full use of these PDPs in raising the awareness and enriching the knowledge of teachers. Upon completing the courses, teachers may integrate what they have learnt with their school-based professional development programmes in professional sharing, as well as collaborative learning amongst teachers in schools as learning communities.

To enable schools to plan and co-ordinate the professional development of teachers for the 2021/22 school year, the CDI has prepared this booklet on Professional Development Programmes for Heads and Teachers of Primary Schools (Web Version) 2021/22 for schools' reference. Final details of the PDPs will be uploaded in phases to the Training Calendar System (TCS) of the EDB (https://tcs.edb.gov.hk). In addition, School Heads and teachers can also make reference to the training arrangements for newly-joined teachers and in-service teachers stipulated in the EDB Circular No. 93/2021 "Implementation of the Recommendations of the Task Force on Professional Development of Teachers" to plan school-based professional development.

Foci of the Programmes

The PDPs offered in this booklet aim to sustain the Learning to Learn curriculum reform introduced since the 2001/02 school year and its continual renewal and development so as to further enhance the quality of primary education. With reference to the feedback and data collected from different channels, the PDPs to be offered in the 2021/22 school year focus on the following:

i) Support for school leaders, middle managers and teachers in curriculum leadership, management, planning and evaluation (e.g. curriculum interface, homework policy, self-directed learning);

ii) Support for teachers in implementing curriculum emphases and cross-curricular learning (e.g. assessment literacy, values education, life education, healthy lifestyle, reading/ language across the curriculum and nurturing generic skills);

iii) Support for teachers in promoting Science, Technology, Engineering and Mathematics Education (STEM), Constitution, Basic Law and National Security Education, and catering for learner diversity (including non-Chinese speaking students);

iv) Support for teachers in promoting information technology in education (including e-learning, information literacy, etc.).

Organisation of the Booklet

School Heads, teachers and other members of staff can quickly identify programmes that may interest them through searching the first five columns on the left of the tables in this booklet which indicate the "Category", "KLA/Subject", "Curriculum Area/ Theme", "Target Group(s)" and "Course Title", as well as the code of "Area(s) Covered" codes shown on the right-hand most column. The title of each course indicates whether it is a "new", "re-run" (programme contents identical or with minor adaptations) or "refreshed" (programme with more than half of its contents updated) course. Brief information in the Annex on student activities provided by different organisations will facilitate schools' early planning of student learning activities in the 2021/22 school year.

Feedback

The CDI will take into consideration feedback from participants on the courses delivered in the current school year and continue to design appropriate programmes in the coming school years. Suggestions from school heads and teachers are welcome and they can be sent to:
