Support Resources

Secondary 2

Module 2.4

Economic Performance and Human Resources of Hong Kong

Part 3:

Youth Employment in Hong Kong

Personal, Social and Humanities Education Section
Curriculum Development Institute
Education Bureau

Introduction

- The “Citizenship, Economics and Society (Secondary1-3) Support Resources” covers the essential learning contents of Strands 1, 5 and 6 in the Personal, Social and Humanities Education Key Learning Area. It is designed to support the implementation of the Citizenship, Economics and Society curriculum.
- The support resources provide diversified learning activities to help students acquire knowledge and understand concepts, develop skills and nurture positive values and attitudes. In addition, they offer teaching guidelines and suggestions on learning and teaching activities for teachers’ reference. Further, they provide reading materials to enhance students’ interest in reading.
- “Module 2.4 Economic Performance and Human Resources of Hong Kong Part 3: Youth Employment in Hong Kong” for Secondary 2 was developed by the Personal, Social and Humanities Education Section, Curriculum Development Institute of the Education Bureau. Part of the contents are based on the learning and teaching materials developed by the Business School of the Chinese University of Hong Kong and Hong Kong Effective Teaching Association, commissioned by our section in 2019 and 2014 respectively.

Introduction to the Resource:

This resource aims at introducing the employment opportunities and challenges for youth brought by the ups and downs of the economy and industrial development, for example, the emergence of new industries and changes in the mode of employment worldwide, and the availability of entrepreneurial and employment opportunities in the Guangdong-Hong Kong-Macao Greater Bay Area. Students will also learn the statistics of the labour market in Hong Kong, as well as changes in the number of employed persons in different industries, which serves as basic information for discussing related topics. The above learning contents help cultivate students' entrepreneurial spirit¹, and encourage them to equip themselves early, be diligent and contribute to society, our country and the world.

Prior Knowledge

At the primary level, students have acquired a basic understanding of the major characteristics and development of the Hong Kong economy. Relevant learning contents in General Studies include “different occupations in the local community”, “major economic activities in Hong Kong”, “factors affecting the economic development in Hong Kong”, “major and emerging industries in Hong Kong”, as well as trade between the HKSAR, the Mainland and other parts of the world. Regarding mathematical skills, students have learned to collect and process data, and known how to use appropriate graphs to show the data and extract information from graphs

Teaching Objectives:

- To understand the knowledge related to the labour market
- To develop and cultivate relevant generic skills, values and attitudes

Learning Points:

- recognise the opportunities and challenges for youth employment brought by ups and downs in the economy, recent changes and future trends of industrial development;
- make informed analysis and judgement on topics and policies related to employment; and
- develop an entrepreneurial spirit and the virtue of diligence, broaden their global perspective, and contribute to society, our country and the world.

Suggested Number of Lessons:

- 4 lessons (40 minutes each)

¹ “Entrepreneurial spirit” includes the qualities of possessing creativity and innovativeness, taking initiatives and responsibilities, taking calculated risks, upholding perseverance in times of uncertainty and seizing the best of the opportunities ahead.

Teaching Design

Topic:	Youth employment in Hong Kong	
Duration:	4 lessons	
Learning Objectives:	<ul style="list-style-type: none"> • recognise the opportunities and challenges for youth employment brought by ups and downs in the economy, recent changes and future trends of industrial development; • make informed analysis and judgement on topics and policies related to employment; and • develop an entrepreneurial spirit and the virtue of diligence, broaden their global perspective, and contribute to society, our country and the world. 	
Lessons 1 and 2		
Pre-lesson preparation:	Students shall finish the following before class: <ul style="list-style-type: none"> - Read “Lead-in Activity: Job survey of Family Members”, “Prior Knowledge Worksheet: Relationship between economic development and labour demand of Hong Kong” and “Prior Knowledge Enrichment Corner: Relationship between the economic development and labour demand of Hong Kong” and complete the activities. 	
		Suggested lesson time
Enquiry Process:	1. Set: <ul style="list-style-type: none"> • The teacher briefly introduces the contents of the four lessons and invites students to share their answers in the “Lead-in Activity: Job survey of Family Members” and “Prior Knowledge Worksheet: Relationship between economic development and labour demand of Hong Kong” with the class. The teacher then summarises the major industries in Hong Kong for different periods and the changes in academic and skills requirements in the labour market. • The teacher asks questions and invites students to share their views on future changes in the labour market. The teacher then guides them to reflect on how they can equip themselves to meet the future needs. 	15 minutes
	2. Interactive teaching: <ul style="list-style-type: none"> • The teacher revises the concept and the calculation of unemployment rate with 	30 minutes

	<p>students by asking them questions. Students guess which age group has a relatively high unemployment rate.</p> <ul style="list-style-type: none"> • The teacher uses “Worksheet 1: Youth unemployment rate” and asks students to form groups of two to finish Questions 1 to 3. Then the teacher invites students to share their answers and revisits the changes in unemployment of Hong Kong for the past two decades and its relationship with the economic performance. • The teacher asks students to form groups of two to finish Questions 4 to 6 and students share their answers and explanations. 	
	<p>3. Interactive teaching:</p> <ul style="list-style-type: none"> • The teacher asks students to read Sources 1 and 2 of “Worksheet 2: Opportunities and challenges for youth employment” and finish Questions 1 and 2. Students then share their answers and explanations. • Students then read Source 3 and form groups of two to discuss and finish Question 3. The teacher then invites a few groups to share their answers and bring out the message that as long as they work hard, there are still many opportunities in order to promote positive values. • The teacher revises the key learning points with the students by using “Knowledge Content: Opportunities and challenges for youth employment” and summarises the factors affecting youth employment and the opportunities and challenges for youth brought about by these factors. <p>Extended learning activity (optional depending on the lesson time and students’ ability level):</p> <ul style="list-style-type: none"> • The teacher distributes “Extended Learning Worksheet: Worldwide new employment trend: Gig economy” and asks the students to read the Sources. Then students form groups of two for discussion and finish the 	30 minutes

	questions. After that, the teacher invites a few groups to share their answers and offers feedback on their answers.	
	4. Conclusion: <ul style="list-style-type: none"> The teacher summarises the lesson and explains the requirements of the homework briefly. 	5 minutes
Homework:	<ul style="list-style-type: none"> Students finish the online quizzes to understand more their interests and abilities, which will help them explore occupations that would be suitable for them: https://www.talent.gov.hk/selfAssessment?lang=en_US Students read “Know More: Manpower Projection to 2027” to understand the changes in the manpower requirements in 2017 and 2027 and share on which industries that they would like to work in when they grow up. 	
Learning and Teaching Resources:	Lead-in Activity; Prior Knowledge Worksheet; Worksheets 1-2; Extended Learning Worksheet	

Lessons 3 and 4		
		Suggested Lesson Time
Enquiry Process:	1. Set: <ul style="list-style-type: none"> The teacher plays the video “Understanding the GBA” (Chinese only) and uses the “Case Study: Opportunities and challenges for young people to start a business and work in the Greater Bay Area (GBA)” to help students have a basic understanding of the GBA. 	15 minutes
	2. Interactive teaching: <ul style="list-style-type: none"> The teacher asks students to form groups of two to read the Sources and finish Questions 1 to 2. After discussion, the teacher invites students to share their answers and offers feedback on students’ work. This part stimulates students to think about the pull factors which attract young people to work in cities of GBA and the opportunities brought about by GBA. The teacher asks students to form groups of two to finish Question 3. After discussion, the teacher invites students to share on the challenges that young people from Hong Kong may face when they work in the GBA. 	50 minutes
	3. Conclusion and students’ reflection: <ul style="list-style-type: none"> The teacher asks students, “Young people face many opportunities and at the same time, the competition is also great. What do you think about your competitiveness in the labour market?”. “As you are studying now, is there any way for you to increase your competitiveness in the future labour market?” Students reflect on the above questions at home. The teacher summarises the lesson. 	15 minutes
Learning and Teaching Resources:	Case Study; Video	

Module 2.4 Economic Performance and Human Resources of Hong Kong
Part 3: Youth Employment in Hong Kong
(Lesson 1 to Lesson 4)
Learning and Teaching Materials

Lead-in Activity: Job Survey of Family Members

Conduct interviews with two elders in your family (e.g. parents, grandparents or other relatives) and one employed sibling (if any) to learn about their working experience and fill in the table below.

Example: Relationship with the interviewee: **Grandmother**

Year	Job of the interviewee		
	Company Name	Post	Industry
1971-1980	May May Garment Factory	Garment worker	Clothing Industry
1981-2000	ABC Fast Food	Cleaning worker	Catering Industry
2001-2010	ABC Fast Food / Copper Lion Building	Cleaning worker / Security guard	Catering Industry / Property management
2011- present	Copper Lion Building	Security guard	Property management

Relationship with the interviewee: _____

Year	Job of the interviewee		
	Company Name	Post	Industry
1971-1980			
1981-2000			
2001-2010			
2011- present			

Relationship with the interviewee: _____

Year	Job of the interviewee		
	Company Name	Post	Industry
1971-1980			
1981-2000			
2001-2010			
2011- present			

Relationship with the interviewee: _____

Year	Job of the interviewee		
	Company Name	Post	Industry
1971-1980			
1981-2000			
2001-2010			
2011- present			

Extended discussion:

1. Collect the survey results of your classmates, and summarise the jobs and positions the interviewees held during different periods of time.
2. How did the employment of the interviewees relate to the economic development of Hong Kong?

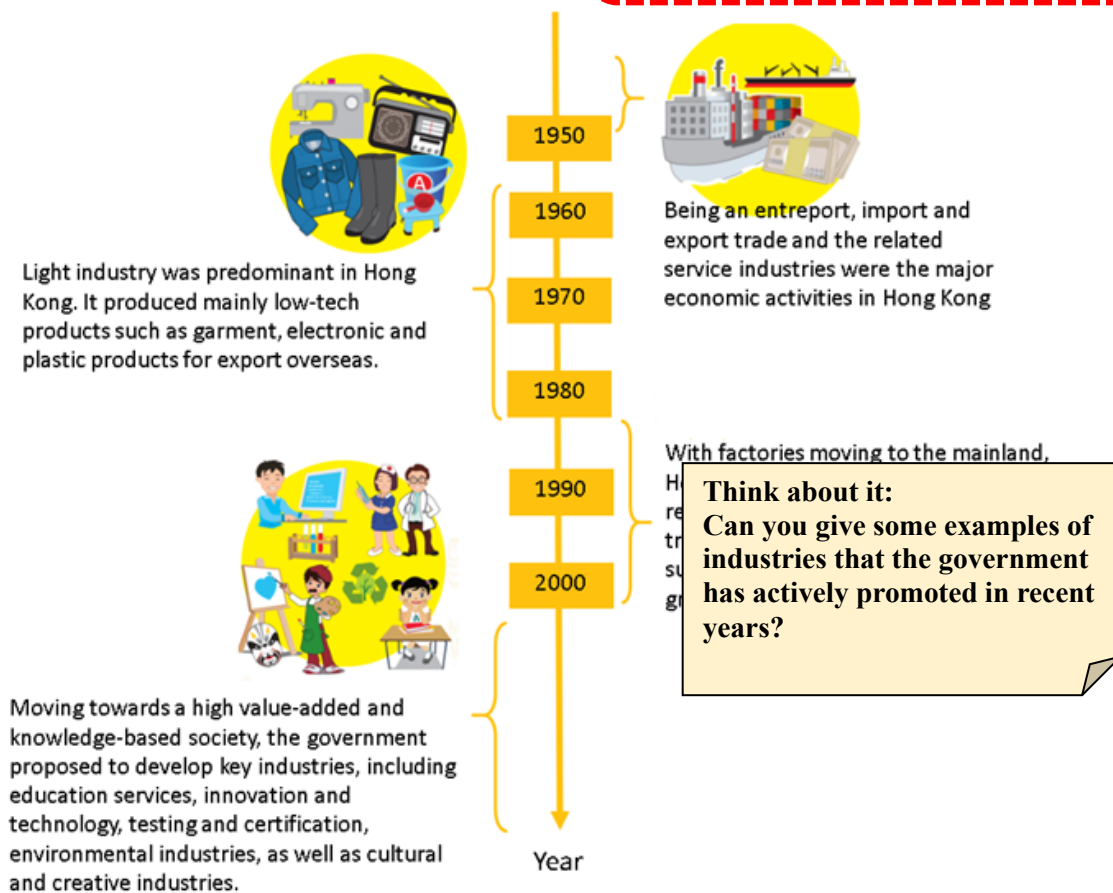

Prior Knowledge Worksheet: Relationship between economic development and labour demand of Hong Kong

With the change of economic environment, Hong Kong has undergone changes in economic development for several times in the past decades. Do you know what industries were dominant in Hong Kong during different periods of time? How has labour demand changed with time?

Students can learn the change in labour demand during different periods of time in Hong Kong based on the information below.

Source 1

Source 2

Labour demand varies with the economic environment. Below are the stories of six people. Try to analyse and learn about the labour characteristics of Hong Kong in different periods of time.

Brother Cheung

In the late 1940s, Hong Kong was a famous entrepot worldwide and goods were shipped to different places around the world through Hong Kong. At that time, I went to the dock everyday with my neighbours and we worked as “coolies” – dockers, while other people worked as seamen. In the past, only children from rich families could go to schools and the like of us had to work at an early age to support our families.

Master Che

I grew up in the 1960s. At that time, most people would work after graduating from primary school, and most of them worked in factories. I remember that my first job was in a garment factory. I was responsible for cloth cutting. I was living a happy life even though I had to do something routine every day. However, with most of the factories moved to the mainland in the 1980s, I lost my job afterwards

Lee Shun

I am a “Post-80s”. I have been looking for a job after graduating from university this year. What I am looking for is simple. As I majored in Finance in university, I’d like to find an office job which requires working with a computer only. I don’t mind undertaking further courses if the work requires.

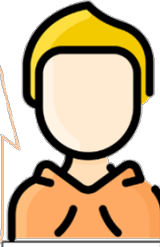

Data Tai

The era of “big data” has come. In business organisations, social, public health and other fields, people make decisions based on data and analysis. I returned to work in Hong Kong after obtaining a data science degree overseas. Now I’m working with an international business organisation. My job is basically about understanding market demands and analysing customer behaviours with big data, so that clients can make better business decisions and launch products better catering to market needs.

Beauty Chong

After graduating from secondary school, I decided to become a full-time Youtuber and run my beauty channel. At that time, I did all the editing, lighting and subtitles on my own. In the first few years, no one really paid attention. Fortunately, I did not give up. Now my channel has 800,000 subscribers. And the profit is good.

Carlos Kung

I’m a photographer/designer/director/lighting technician! That’s right. I’m one of the slashies, people having several jobs at the same time! When I was choosing my career, I thought, “I have so many multimedia production skills and I’m interested in many areas. So why limit myself to one job! As a slashie, my work is diversified and very challenging. And I’ve found greater self-worth!

Based on Sources 1 and 2 above, analyse the main industries, as well as the academic qualifications and skills required of the labour force in different periods.

Period	Person in Source 2	Major industries	Characteristics of labour in the industry (E.g., academic qualifications, skills)
1940-1950	<i>Brother Cheung</i>	<i>Import and export trade, handling goods at the dock</i>	<i>No academic qualifications or skills are required</i>
1950-1970	<i>Master Che</i>	<i>Manufacturing</i>	<i>Low academic qualifications, low skills</i>
2000	<i>Lee Shun</i>	<i>Service sector</i>	<i>High academic qualifications and professional skills</i>
Post-2010	<i>Data Tai</i>	<i>Information and communications technology</i>	<i>High academic qualifications and professional skills</i>
Post-2010	<i>Beauty Chong</i>	<i>Cultural and creative industries</i>	<i>No specific academic requirements; relevant skills required (e.g., video editing skill)</i>
Post-2010	<i>Carlos Kung</i>	<i>Cultural and creative industries</i>	<i>No specific academic requirements; multiple skills required</i>

Prior Knowledge Enrichment Corner

Relationship between the economic development and labour demand of Hong Kong

Labour demand of Hong Kong has undergone great changes in the past few decades. During the 1970s and 1980s, light industries were predominant in Hong Kong with manufacturing industries as the backbone of the economy. Labour-intensive industries, such as garment, toys and textile had a huge demand for low-skilled and less-educated labour force. However, with most of the factories moving to the Mainland since the 1980s for a lower production cost, manufacturing industries declined gradually in Hong Kong. With the booming of service industries such as finance and trading, Hong Kong economy became more dependent on service industries.

Nowadays, Hong Kong is a service-oriented economy. The government encourages the development of a knowledge-based economy, focusing on high value-added services, such as finance, trading and logistics, tourism, industry and commerce support and professional services (four pillar industries). Moreover, it also promotes the development of information technology and information services industries, innovation and technology industries, and cultural and creative industries. It reveals a change of demand on the labour force. Professional, educated and skilled labour is preferable for its economic development.

Think About It

What is the direction for the future development of Hong Kong? What will be the demand for labour after I graduate ? And how can I prepare for it?

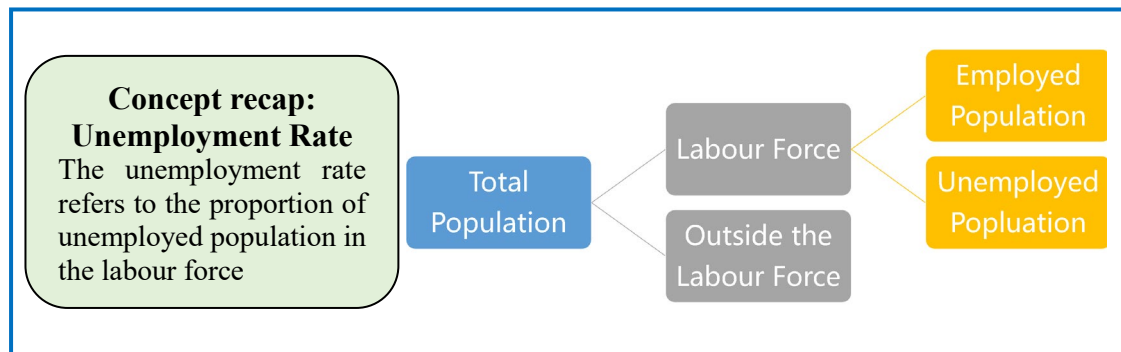

Hong Kong will develop into a knowledge-based economy, focusing on high-value added services. The labour market will need workers with high qualifications, professional knowledge and high-tech skills. Different innovation, cultural and creative industries and even some industries that we have never thought of emerge. As a student, I should pay attention to the changes of the labour market and work hard to acquire knowledge and skills, in particular generic skills (such as communication skills, problem solving skills and creative thinking) so as to meet the needs of a knowledge-based economy.

Online Learning:

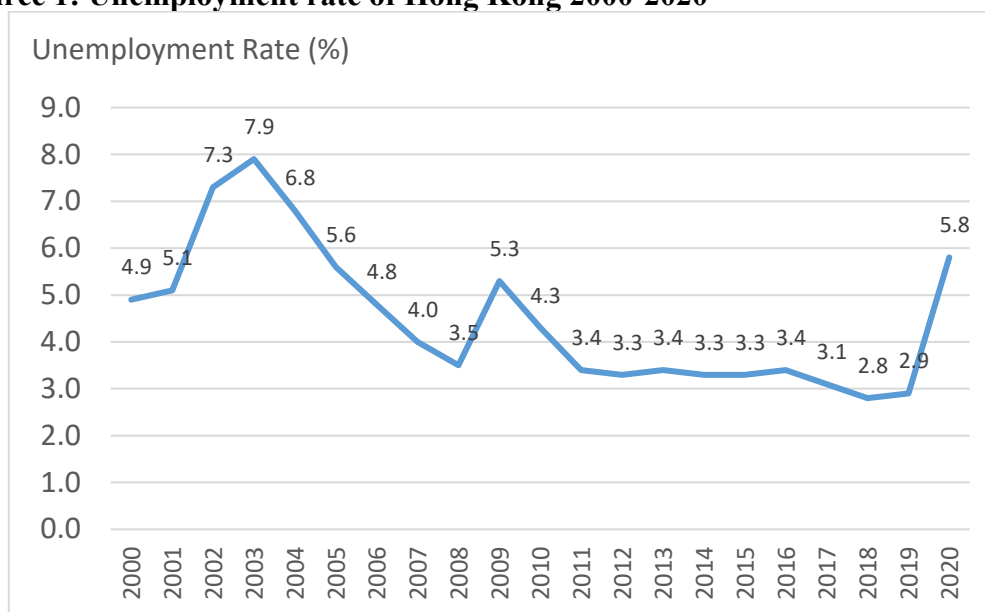

Browse the website of the Census and Statistics Department to understand the employment situation in Hong Kong in recent years.

<https://www.censtatd.gov.hk/en/scode200.html>

Worksheet 1: Youth Unemployment Rate

Source 1: Unemployment rate of Hong Kong 2000-2020

Source: Census and Statistics Department

https://www.censtatd.gov.hk/en/web_table.html?id=6

1. According to Source 1, what were the highest and lowest unemployment rates in Hong Kong during the past 20 years? In which year did they appear?

In the past two decades, Hong Kong's unemployment rate was the highest in 2003, about 8%. Since then, the unemployment rate has generally fallen from a high level and changed with economic fluctuations during the period.

According to the above chart, the unemployment rate in 2018 was the lowest, only about 3%. However, Hong Kong's unemployment rate was about 6% in 2020 when there was an outbreak of the Covid-19 epidemic.

- Refer to the Internet and books, try to point out the important events that have affected Hong Kong's unemployment rate in 2003, 2009 and 2020.

2003 : the SARS epidemic

2009 : 2008 Global Financial Crisis

2020: the outbreak of the Covid-19 epidemic

- How is the unemployment rate related to the economic condition? Why?

When the economic situation is bad, the purchasing power of people will be weak. It will hit the retails and catering industries. As a result, the demand for labour will be lower and unemployment rate increases.

Source 2: : Unemployment rate of particular age groups in Hong Kong 2000-2019

Source: Census and Statistics Department (2020) (Table E021 : Unemployed persons by a ge and sex (Table 2.1 in Quarterly Report on General Household Survey)
<https://www.censtatd.gov.hk/en/EIndexbySubject.html?pcode=D5250025&scode=200>

4. Compare the data of unemployment rate of Hong Kong as a whole in Source 1 and the data of unemployment rate of particular age groups in Source 2. Generally speaking, what is the difference between the two?

The unemployment rate of teenagers in the 15-19 and 20-29 age groups is higher than the overall unemployment rate. The unemployment of the 15-19 age group is particularly serious, being at least doubled that of the overall unemployment rate. (Note: It should be noted that many in the 15-19-year-old population are students, and hence the working population in this age group is smaller. However, the unemployment rate is calculated as the ratio of the unemployed to the working population. Therefore, it is possible that the unemployment rate of this age group is higher than the overall unemployment rate.)

5. Why do people in the 15-19 age group face greater employment difficulties?

People in this age group are mostly less educated and have little work experience. They lack competitiveness and tend to have difficulties in finding a job. Therefore, the unemployment rate of this age group is higher than those of other age groups.

6. Compare the unemployment rate of Hong Kong as a whole in Source 1 and those of the age groups in Source 2. What is the impact of an economic downturn on the employment of young people? (Hint: What factors will affect the employment of young people?)

According to Sources 1 and 2, the unemployment rate of young people, especially that of the 15-19 age group, is obviously higher than the territory-wide figure. Taking the two unemployment peaks in 2003 and 2009 as examples, in 2003, the unemployment rate of the 15-19 age group was around 30%, being at least triple the territory-wide figure which was around 8%. In 2009, there was a significant gap between the unemployment rate of the 15-19 age group which was over 20% and the territory-wide figure which was over 5-6%. In an economic downturn, many companies have to lay off people, making it even

more difficult for inexperienced young people to find suitable jobs. As a result, the youth unemployment rate rises.

Think about this:

The economic downturn and job shortfall make it more difficult for young people to secure employment. However, opportunities exist even in adverse situations. For example, during the outbreak of the COVID-19 epidemic, some companies found business opportunities by exploring and strengthening online sales channels. Can you think of other examples of resilience against

Worksheet 2: Opportunities and Challenges for Youth Employment

Source 1: Nancy's story

Nancy completed Secondary 6 this year. This is her story during the COVID-19 epidemic:

“The economic conditions of my family are not good. And my academic performance is not satisfactory. So I want to start working as soon as possible to get practical working experience. And on the other hand, I can earn money and lessen the financial burden of my family. I would like to work in the tourism or the retail industry. Unfortunately, I still can't find a job after graduation for more than six months. I've attended many interviews, but all in vain....”

Source 2: A report about Stark Chan Yik-hei, “Son of the Star”

“Stark came from a grassroots family. With his curiosity and self-motivation, he excelled in a scientific competition. And Massachusetts Institute of Technology (MIT) named an asteroid after him when he was only 14.

After completing Secondary 5, Stark was granted special admission into the Hong Kong University of Science and Technology for the Bachelor Programme of Electronic and Computer Engineering. The world is paying more and more attention to innovation and technology development. So after graduation, Stark founded an IT start-up for programming and participated in the government-sponsored Cyberport Incubation Programme. He received more than 300,000 Hong Kong dollars in subsidies and a rent-free office for two years.”

Source 3: An online article about AI

The development of robots and Artificial Intelligence (AI) has entered its golden era in recent years. Robots replacing humans in workplaces is no longer just a plot in science fiction movies, it happens in real life. According to a report published by the McKinsey Global Institute in 2017, repetitive tasks generally have higher automation potential. It was estimated that half of the current tasks in the global economy would be automated by around 2055. Meanwhile, some of the higher-skilled occupations, such as lawyers and accountants, are also affected by automation. Are robots and AIs our friends or foes? Will they replace humans?

Source: Web page of HKSAR Government Human Resources Planning Commission, https://www.talent.gov.hk/onlineMagazineDetail/65?lang=en_US&name=AI%E6%AE%BA%E5%88%B0%E5%9A%9F%E4%BA%BA%E9%A1%9E%E5%86%87%E5%9F%9E%E4%BC%81

1. Based on Source 1, analyse the employment challenges faced by Nancy.

Factors include the economic downturn, the decline in demand for labour, and the reduction of jobs. In addition, Nancy is a fresh graduate. She does not have relevant experience in the industry, which makes it more difficult for her to find a job in her desired sector (tourism or retail industry).

2. Based on Source 2, analyse the factors contributing to Stark Chan's success.

While Stark Chan's family background and academic performance were not very good, he managed to find his own interest and develop his unique skills. He achieved impressive achievement with perseverance and persistence. Besides, in the time of economic transformation, the world is paying more and more attention to innovation and technology development. And the demand for related skills increases in society. Stark Chan seized the opportunity and benefited from the Government's support programme for entrepreneurship. So he succeeded.

3. Based on Source 3, discuss with your classmates the changes that the AI development will bring to the job market.

With the advancement in AI technology, many jobs may be replaced by AI. Both low-tech positions and professional ones will be affected. But on the other hand, AI development and applications will create new products and services and create new demands and opportunities. It will also generate new jobs, businesses and economic incomes.

Opportunities and Challenges for Youth Employment

There are many factors that affect the employment of young people, such as their own personalities, academic qualifications, job-hunting goals. There are even uncontrollable factors, such as personal experiences and luck, which also affect their employment opportunities. Here we will focus on the opportunities and challenges brought about by ups and downs in the economy, industrial development and policy-related factors to youth employment.

1. Ups and downs in the economy

Hong Kong as a small and open economy

Economic environment is one of the factors affecting employment. Since **Hong Kong's main economic activities are closely connected with other regions in the world**, local economic development can be easily affected by **external factors**. **If the external economies turn bad**, such as the Asian Financial Crisis in 1997-98 and Global Financial Crisis in 2008, Hong Kong's economic performance will be seriously affected. Additionally, some occasional incidents, such as the outbreak of the COVID-19 epidemic in 2019, resulted in global and local recession. Under such circumstances, corporations would cut down operational cost by reducing their employment of labour. Therefore, unemployment rate will rise in the years of economic recession. It is even a greater challenge for young people with less education and experience.

Fierce competition in the labour market

Due to the high labour cost in Hong Kong and competition brought by **globalisation**, **some service-related positions have been relocated to other places**. Besides, the number of local university graduates has increased rapidly. Therefore, competition in Hong Kong's labour market has become increasingly fierce. Facing the rapidly changing labour market, young people need not only acquire more skills, but also cooperate and compete with people from different places.

2. Industrial development

Changes in Industries

Hong Kong has undergone many economic changes over the past decades. The local economy has gradually changed from industry-oriented into **service-oriented**. **With the development of innovative technologies**, especially the advancement of the AI technology, **many jobs may be replaced**. Both low-tech positions and professional ones will be affected. But on the other hand, AI development and applications **will create new products and services** and bring about new demands and opportunities. It will also generate new jobs, businesses and economic incomes.

3. Policy support

A lot of local young people aspire to start their own business. But they lack sufficient capital and experience. It is difficult for them to succeed without support. In view of the situation, **the Government has made concerted efforts with various sectors of the community to provide strong support for youth innovation and entrepreneurship** in recent years. Related initiatives include the “Youth Development Fund” and the “Space Sharing Scheme for Youth”. Besides, Hong Kong Science Park and Cyberport have rendered holistic support for start-ups.

“Gig economy” generally refers to the practice that people sign work contracts through Internet platforms, usually for short-term and temporary hires.

Extended Learning Worksheet

Worldwide New Employment Trend: Gig Economy

Source 1: A brief introduction of Slashies

With the advancement of the Internet and the rise of the gig economy, the slashie culture has become a popular work style among young people in recent years. Slashies, also known as slashers or multi-hyphenates, refer to young people who are no longer settled for a single job but instead choose a diverse life with multiple occupations and identities. They give up the conventional work pattern in society mostly because of their expertise or interest. Generally speaking, when asked about their occupations, slashies tend to place their jobs between slashes, such as doctor/dance teacher or photographer/cook. Why are there slashies? Some people explain that the new generation does not want to limit themselves to a single job. Others believe that the new generation has more choices and want to have them all. Some regard it as a phenomenon of globalisation. The new generation no longer needs a fixed office and has more flexibility and possibilities at work. It reflects the changes in social and economic patterns. The labour market is changing as well.

Source 2: Views of stakeholders

By doing different jobs, we discover our interests and develop multiple skills. And in the process, we try new industries and courageously pursue what we like. For us, work is not just about money. We also hope for development in fields we are interested in or good at. We have a fighting spirit. And we yearn for the self-satisfaction and sense of value brought about by multiple careers. As slashies, we can improve our quality of life and experience.

Ted, Slashie

Winnie, Slashie

I once had a conventional nine-to-five job. But gradually I became tired of it. So I started a “second job” to have fun and to explore diverse career paths. Later, I’ve come to like doing gig jobs. Because there’s much freedom and flexibility at work. And there is the opportunity to accumulate different work experiences. There’s also the benefit of self-enhancement as it inspires me and develops my social network. So I quit the original job.

I didn't volunteer to become a slashie. But youth unemployment is serious. The number and proportion of young and poor people has been increasing year by year. And the inflation problem is getting serious. With the rising cost of living, I have to do more than one job. Otherwise I can't make a living. So I have no choice but to become a slashie. Since gig jobs generally don't pay well, I need to do few jobs. Gradually I just focus on money. I have lost purpose and become less competitive. It's a vicious circle.

Yat, Slashie

Economist A

First of all, technological breakthroughs have transformed the economy. With the rise of innovative service sectors, everyone can become an independent service provider with the support of the Internet and information technology. Therefore many new economic forms have emerged, such as Airbnb and Uber. When the gig economy gradually becomes popular, conventional job opportunities are reduced. And when the threshold for a job becomes lower, more and more young people are embracing the gig economy.

Young people in the gig economy as good as we imagine. In fact, except for a few high value-added gigs, most of the jobs are repetitive and highly replaceable, such as food delivery persons and Uber drivers. In the long run, there will be a "gig economy trap". To pursue "quick money", they spend all their spare time in the gig economy. And then they miss the golden time in life for improving themselves or learning professional skills. They get poorer as they continue working, forming a vicious circle that may result in a stagnation in their career development.

Economist B

Labour rights expert

The employment relationship is also one of the concerns. In the gig economy, there is a connection between workers and companies. But it cannot be clearly defined as employer-employee relationship. By outsourcing jobs, employers mitigate risks, shirk responsibilities and thereby reduce operating costs. The "temps" don't have employment protection or welfare. They can't be protected by minimum wages or don't have paid sick leaves or maternity leaves. And they can't claim for unemployment or disability benefits. In many cases, they don't even enjoy basic labour rights.

Answer the following questions.

1. Determine whether the following statements about slashies are right or wrong.

(a) Slashies refer to young people with multiple occupations.	Right	Wrong
(b) Slashies work entirely based on their interests.	Right	Wrong
(c) The emergence of slashies shows that the economy of the society is changing, thereby changing the labour market.	Right	Wrong
(d) Economic transformation drives the emergence of slashies.	Right	Wrong
(e) Slashies can enjoy more freedom and flexibility at work.	Right	Wrong
(f) Slashies enjoy the same labour rights as conventional workers.	Right	Wrong
(g) Most slashies are doing highly repetitive and replaceable jobs.	Right	Wrong

2. What opportunities does the gig economy model bring to young people?

Young people improve their quality of life and experience by being slashies. Not only can they develop their interest or expertise and earn more money, but they can also explore diverse careers and get a sense of satisfaction. In addition, the gig economy gives young people opportunities for self-enhancement. At the same time they can enjoy much freedom and flexibility at work. It helps accumulate different work experiences. And it inspires them and develops their social network.

3. What challenges do young people face when they choose the gig economy model? Why do they still choose to be slashies?

Many gig jobs are highly repetitive and replaceable. Young people engaged in the gig economy do not keep learning and equip themselves with new skills, with the result they may have stagnation in their career development. Besides, the employer-employee relationship in the gig economy model cannot be clearly defined. Therefore, employers will not provide corporate protection or welfare. The labour rights of slashies may not be well-protected. Technological breakthroughs have transformed the economy. Conventional job opportunities are reduced. The threshold for a job becomes lower in the gig economy. As a result, young people who cannot find a full-time job in

conventional sectors have no choice but to become slashies. On the other hand, some young people want to pursue their career in the fields of their interest or expertise. Or they want freedom at work. So, they choose the gig economy model.

To Know More: Manpower Projection to 2027

Make reference to the following information and understand the demand for labour of different industries in 2017 and 2027.

Table 4: Manpower Requirements by Economic Sector in 2017 and 2027

Economic sector	Actual manpower requirements in 2017		Projected manpower requirements in 2027		Projected change from 2017 to 2027	Projected average annual rate of change (2017-2027)
	(Number)	(% share)	(Number)	(% share)		
Agriculture, fishing and quarrying	3 900	0.1	1 900	0.1	- 2 000	- 6.8%
Manufacturing	97 200	2.7	72 700	1.9	- 24 500	- 2.9%
Electricity, gas, water and waste management	16 100	0.4	16 500	0.4	+ 500	+ 0.3%
Construction	348 600	9.6	367 400	9.8	+ 18 800	+ 0.5%
Import, export, wholesale and retail trades	884 000	24.5	830 600	22.2	- 53 400	- 0.6%
Accommodation and food services	288 500	8.0	298 500	8.0	+ 10 000	+ 0.3%
Transportation, storage, postal and courier services	319 600	8.8	313 800	8.4	- 5 700	- 0.2%
Information and communications	115 800	3.2	130 700	3.5	+ 15 000	+ 1.2%
Financial services	264 000	7.3	294 600	7.9	+ 30 500	+ 1.1%
Real estate	140 000	3.9	152 200	4.1	+ 12 200	+ 0.8%
Professional and business services	402 700	11.1	460 900	12.3	+ 58 200	+ 1.4%
Social and personal services	732 200	20.3	799 700	21.4	+ 67 400	+ 0.9%
Total	3 612 600	100.0	3 739 600	100.0	+ 127 000	+ 0.3%

Note: Individual figures may not add up to the totals due to rounding.

Table 6: Manpower Requirements of the Selected Industries in 2017 and 2027

Selected industry	Actual manpower requirements in 2017 (Number)	Projected manpower requirements in 2027 (Number)	Projected change from 2017 to 2027	Projected average annual rate of change (2017-2027)
Information technology and information services	72 300	90 000	+ 17 800	+ 2.2%
Innovation and technology industries	38 000	57 600	+ 19 600	+ 4.3%
Cultural and creative industries	217 800	238 000	+ 20 200	+ 0.9%
Environmental industries	45 200	51 500	+ 6 300	+ 1.3%
Testing and certification services	14 500	16 600	+ 2 100	+ 1.3%

Reflection

In what industry do you want to work when you grow up? What do you expect about the prospect of that industry when you graduate from school?

Case Study: Opportunities and challenges for young people to start a business and work in the Greater Bay Area (GBA)

Watch the video clip to get a preliminary understanding the Guangdong-Hong Kong-Macao Greater Bay Area

The Academy of Chinese Studies, Understanding the GBA

<https://ls.chiculture.org.hk/tc/concept/0056>

Source 1: Views of stakeholders

Government
Official

The development of the GBA has created a large number of job opportunities. Young people of Hong Kong can bring their international vision and professional skills into play. There are also policies to address the different professional systems across the boundary. For example, lawyers from Hong Kong and Macau can practise in other cities in the GBA.

The Hong Kong SAR Government has set aside additional resources to support our performances or other suitable cultural exchange activities in the GBA, with a view to showcasing Hong Kong's arts and culture. This provides new opportunities to Hong Kong artists and arts groups, so that more people can enjoy our performances. It also nurtures future administrative staff and programme organisers.

Young artist

Hoi, university
graduate

I've heard of the GBA. But I don't know much about the policies. And I can't find relevant information about the job market there. Besides, I'd like to become a clinical psychologist. But the registration systems for psychologists in the Mainland and Hong Kong are not the same. If I want to practise in the Mainland, I'm afraid I will have to get a new license!

I came to learn about the development and opportunities in the Mainland through the Government's internship and exchange programmes in the Mainland as well as entrepreneurship programmes in the GBA. There are the "Youth Internship in the Mainland", the "Scheme on Corporate Summer Internship on the Mainland and Overseas" and the "Funding Scheme for Youth Exchange in the Mainland", etc. I think the GBA has created an entrepreneurship-friendly environment. The Hong Kong SAR Government has even launched the "Youth Development Fund". I got start-up funds and support for my company's development in Shenzhen. Now it has grown from an idea of start-up to a ten-person team.

MWYO (2020) 《香港青年在大灣區就業的可能性及政策建議》

1. Based on the above Sources and your own knowledge, which factors may be currently attractive to young people for considering to work in GBA cities? Name one of the factors and explain.

A large number of job opportunities: There are a lot of job opportunities in the GBA. Young people of Hong Kong can bring their international vision and professional skills into play. The GBA also enjoys policy support from the country to facilitate its development. So it is attractive to young people.

Internship and exchange activities as well as GBA start-up programmes: The Government is committed to promoting internship and exchange activities in the Mainland as well as entrepreneurship programmes in the GBA. Such initiatives help Hong Kong young people understand the development and opportunities in the Mainland and foster their sense of national identity. For example, the “Youth Internship in the Mainland”, the “Scheme on Corporate Summer Internship on the Mainland and Overseas” and the “Funding Scheme for Youth Exchange in the Mainland” help attract young students or fresh graduates to work in the GBA.

Active measures on cultural development: The Hong Kong SAR Government supports cultural projects in the GBA through policies and resources. It helps attract young people who are interested in art to pursue their careers in the GBA. For example, from 2018-19 onwards, the Hong Kong SAR Government has set aside additional resources to support performances or other suitable cultural exchange activities by artists and arts groups from Hong Kong with a view to showcasing Hong Kong’s arts and culture, while providing new opportunities to Hong Kong artists and arts groups, as well as nurturing future administrative staff and organisers.

Entrepreneurship-friendly environment: The Shenzhen Government encourages technology and innovation projects in Shenzhen, Hong Kong and Macao. The Hong Kong SAR Government has launched the “Youth Development Fund” to provide funds to support entrepreneurship and incubate entrepreneurial ideas. Those measures help attract aspiring young entrepreneurs to start

business in the GBA

(Other reasonable answers)

2. Based on the above Sources, what opportunities do you think the GBA can bring to young people? Please give two examples.

The GBA offers many opportunities to aspiring young entrepreneurs, because there are a lot of support measures in different cities.

It also broadens the horizon of young people working in the cultural and arts industry, because they can get more performance opportunities.

Young people with professional skills can benefit from relevant policies. For example, lawyers from Hong Kong and Macao can practice in the GBA. They have greater flexibility in choosing to work in the GBA.

3. Try to cite a challenge that young people from Hong Kong may face when they work in the GBA.

Institutional differences: Professionals who work in the GBA may have to adjust to a new professional regime and may even need to get a new licence.

Habits: There are certain differences in language and habits between Hong Kong and the GBA. It may take some time for the youth of Hong Kong to adapt when they work in the GBA.

(Other reasonable answers)
