Key Question

How is film-making related to literacy instruction?

Film-making offers various opportunities to learn and practise using English while developing 21st century skills. Films are multimodal texts that are listened to and viewed simultaneously.

Aim

The Seed project, REEL to REAL (R2R): Learning English and Developing 21st Century Skills through Film-making in Key Stage 2, aims to explore ways to use film-making as a means of motivating and supporting primary students to learn English as a second language.

R2R Project Features and Connections to the ELE KLA CG 2017

- The proposed R2R film-making projects include most of the nine Integrated Generic Skills, the three Strands, and meet many of the learning objectives of the English Language Education (ELE) Key Learning Area (KLA) Curriculum Guide (CG) (2017).
- Lessons within the R2R project will combine instruction in English language (vocabulary, grammar structures, reading, writing, speaking and listening) and movie-making.
- Each project builds upon both prior and newly acquired knowledge, scaffolds skills in both English and cinematic techniques, and each unit would have its own culminating task and product created using technology and the four language skills.

Connections to the ELE KLA CG 2017 (KS2)

Listening:

- Identify and discriminate sounds, stress and intonation
- Listen for information, ideas, intended meanings, views, attitudes, and feelings in a variety of spoken texts

Speaking:

- Participate effectively in an oral interaction
- Present information, ideas, intended meanings, views, attitudes and feelings clearly, coherently and appropriately in a variety of contexts

Reading:

- Understand the basic conventions of written English
- Construct meanings from texts
- Locate information and ideas

Writing:

- Use the basic conventions of written English
- Present information, ideas and feelings clearly and coherently

What are 21st Century Skills?

What are the 6 Cs?

The 6 Cs of Education

The 6 Cs of education are key 21st century skills that need to be developed for both student and society well-being (Michael Fullan).

Research shows that the 6 Cs are equally important and need not be taught sequentially or in order of priority.

When learners are exposed to learning environments and assigned collaborative tasks, their 6 Cs can develop and thrive.

Objectives

- Design integrated learning activities which provide opportunities for students to develop and apply a range of language, digital literacy and generic skills
- Create opportunities for students to be not only consumers, but also creators skilled in using art and technology, through the learning and teaching of cinema to enhance and extend literacy skills

Objectives

- Facilitate the development of students' generic skills and 21st century skills
- Promote effective use of assessment for learning, as learning and of learning, among teachers
- Evaluate the impact of film-making on the learning, teaching and assessment of English as a second language

Why Film-making?

Reel to Real (R2R) is designed to promote film-making and integrate it into the English Language curriculum.

R2R adopts a project-based learning approach (Willis, D., & Willis, J., 2007) through which to promote students' use of the art and techniques of film-making and to facilitate the learning of English through language arts and digital information technology.

Guiding Research Questions

1. What conditions need to be put in place so that film-making can be promoted to facilitate students' learning of English as a second language?
2. With use of technology, how have students become creators, rather than merely consumers, of information?

Guiding Research Questions

3. How has the teaching and learning of film-making supported the development of the students' 21st century skills?
4. To what extent has film-making helped second language students develop their language skills?
5. What changes are seen in the school-based assessment to include assessment for and as learning strategies?

Inspire

- Students need examples to understand the ingredients of a film (structure of a narrative, message, camera angles, voice, sound)
- What makes a film entertaining? Students need to know the success criteria (rubric)

Cinematic Techniques

Types of Shots: Distances and Angles

Long Shot

Close Up

Medium Shot

- The shot type and shot composition will be some cinematic techniques learned and applied by the students
- The effect of sound (music and effects) on the film viewer, and the feelings and reactions it causes, is important to the students' films
- The culminating task will be to make a short film that includes voice-over narration and English captions

The Country Park Fire Storyboard

 [Shot 1] One day, John went to the country park for the day. He was very excited.	 [Shot 2] He went fishing and was in the river. He was enjoying fishing very much. After a while got very hungry and decided to have a BBQ. He started his favourite lunch, barbecue.	 [Shot 3] Suddenly, the BBQ grill caught al fire!	 [Shot 4] He tried to put it out but the fire spread and soon the trees were on fire!
 [Shot 5] John was very scared. He cried for help.	 [Shot 6] Luckily, the fireman heard him and came on his truck all that on the road.	 [Shot 7] When the fireman arrived he used his hose to put the fire out.	 [Shot 8] In the end the fireman and John ate the barbecue. They were relieved that the country park did not burn down and John never had a BBQ again!
