Brief Description (e.g. Objectives, expected outcomes)	<p>The project aims at exploring and developing effective strategies for the learning and teaching of mathematical modelling through various topics of secondary Mathematics to promote STEAM education. The project investigates how concepts and techniques in mathematical modelling could be infused into mathematics topics to enhance students’ ability to integrate and apply mathematical knowledge and skills to real-life scenarios.</p> <p>The objectives and expected outcomes of the project are:</p> <ul style="list-style-type: none"> ● to explore and develop effective strategies for the learning and teaching of mathematical modelling through various topics in secondary Mathematics ● to promote STEAM education by infusing activities of mathematical modelling when making use of the lesson time allocated to the Further Learning Unit in secondary Mathematics curriculum ● to try out and refine various learning and teaching activities ● to build up and support the development of resources in STEAM education ● to share the experiences of the participating schools and disseminate the project results through the professional development programmes for teachers
