IT Security Guidelines

[G3]

B/Ds shall prevent unauthorised user access and compromise of information systems, and allow only authorised computer resources to connect to the government internal network.

11.1 Business Requirements of Access Control

(a) Principle of Least Privilege

B/D shall ensure that the least privilege principle is followed when assigning resources and privileges of information systems to users as well as technical support staff. This includes restricting a user's access (e.g. to data files, to IT services and facilities, or to computer equipment) or type of access (e.g. read, write, execute, delete) to the minimum necessary to perform his or her duties.

(b) Remote Access / Home Office

Remote access or home office enables users to work remotely at any time. While improving productivity, this introduces security risks as they are working on non-

(a) Patch Management

To avoid attacks through known issues or vulnerabilities, LAN/system administrators shall apply latest security patches/hot-fixes released by product vendors to the information systems including the operating systems, database software, programming libraries and applications running on them, or implement other compensating security measures. B/Ds should ensure that their LAN/system administrators are well informed of the latest release of security patches/hotfixes.

A responsive patch management process is critical in maintaining the security of information systems. With the increase in vulnerabilities discovered and the corresponding patches released, it is essential that LAN/system administrators should manage the patching process in a systematic and controlled way.

就最近咁多學校伺服器被 **HACK**，資料外洩，不如大家諗吓學校有啲乜野可以做，讓大家留意。例如：

- 將不同系統內**多餘**（或可被替代）的個人資料刪去（例如運動會程式內之「出生日期（用來計 **GRADE**」及「身份証號碼（用作 **DEFAULT WEBLOGIN PASSWORD**）」
- **更新 SERVER (WINDOWS) 及 PACKAGES (LINUX)**，盡可能不使用已無 / 將無 SUPPORT 版本，例如 **WINDOWS SERVER 2008** 或更早版本

就最近咁多學校伺服器被 **HACK**，資料外洩，不如大家諗吓學校有啲乜野可以做，讓大家留意。例如：

- 在 **SERVERS** 減少或停止使用非官方 **PLUG IN** (例如 **WORDPRESS OR CMS** 系統) 及非官方 **PACKAGES AND UPDATE CHANNEL** (針對 **LINUX** 系統)
- 更改網絡設備之登入資訊，切勿使用 **DEFAULT PASSWORD (OR EVEN USERNAME)**

A large, colorful word cloud centered around the words "thank" and "you". The word "thank" is in blue, and "you" is in yellow. Numerous other words in various languages are scattered around them, including "danke" (German), "спасибо" (Russian), "gracias" (Spanish), "merci" (French), "mochchakkeram" (Korean), and many more. The background is white, and the text is in different colors and sizes.
