**Synopsis 故事大綱 :**

Mirror, mirror on the wall, who's the fairest of all?'

After the King has passed away, the vain Queen, a plastics lover, orders the whole kingdom to turn everything into plastics. One day when her Magic Mirror proclaims her kindhearted stepdaughter Snow White who cares for the environment the most beautiful one of all, the jealous Queen is furious. She sends a hunter to kill Snow White who then flees into a forest where she meets seven lovable endangered species; however, the nature has been polluted by plastics and thus is no longer alive. How will Snow White and the seven 'dwarfs' save the nature and the entire kingdom from being polluted?

Will their adventures lead them into a trap by the wicked Queen, or to the 'happily ever after' ending?
