

Personalising

Negative thinking

It must be because I'm doing a bad job of teaching him! I'm such a terrible parent!

Situation: The parents think their child doesn't do as well as his peers in many aspects. They also think there are problems with his studies, social life and emotions.

Positive thinking

Taking care of a child is not one person's job. The teaching of the father, teacher and grandfather, as well as the efforts of the child himself, all has some impact.
