Systems and Control Module

for junior form Technology Education currirulum

Concept Map

```
                          ┌──────────────────┐
                          │ Systems and Sub- │
                          │     systems      │
                          └──────────────────┘
                                   │
                          ┌──────────────────┐
                          │ Control Systems  │
                          └──────────────────┘
```

- Systems and Sub-systems
- Control Systems
- Evaluating Control Products
- Designing with System
- Analysing the Performance of Systems
- **Using Kits**
- Electronics and Control Products
- Electronic Sensing
- Ways of Creating Electronic Product
- Electronic Control of Systems
- Control of Systems Using Logic

  Microprocessor / Computer Control
- Detecting Changes in the Environment
- Control Mechanical and Pneumatic Systems
- **Putting Your Product Together**
