(a) In figure (a), $\angle ABC = 15^\circ$, and a sequence of isosceles triangles can be drawn as shown.

What is the largest number of such triangles that can be drawn?

Answer: The largest number of such triangles is ___________.

(b) In figure (b), $\angle PQR = x^\circ$, and a sequence of isosceles triangles is drawn as shown. The largest number of such triangles that can be drawn is 20. Find the greatest integral value of $x$.

Answer: The greatest integral value of $x$ is ___________.
